

Manufacturer qualification

The introduction of the standard EN 1090 at the beginning of 2011 contains that welding workshops have to fulfil uniform requirements for welding work subject to mandatory supervision. Only orders for metal structures can be distributed to companies that have been inspected and certified by a recognised organisation such as TÜV NORD.

However, the standard is not the same for all workshops:

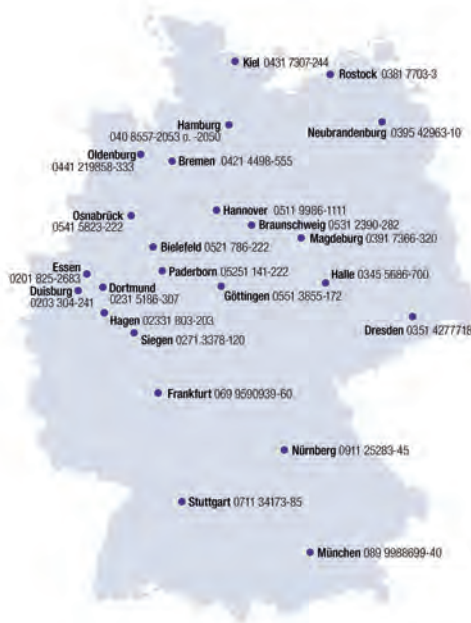

Depending on the type of load-bearing structure to be welded, the welding process used, the material and other criteria, the standard divides into four different execution classes. Special requirements must be fulfilled for aluminium structures, tank installations, fairground rides and other temporary structures.

TÜV NORD has the necessary accreditations in order to perform manufacturer qualifications in the area of the Pressure Equipment Directive, the railway and the defence technology sectors. The TÜV NORD certification enjoys worldwide recognition and will help you win new customers. We also offer further welding inspection and other services based on more than 100 years of experience.

TÜV NORD - Making our world safer.

Our services

- Confirmation of safe and reproducible work processes according to AD 2000-HP0, EN ISO 3834, EN 1090, EN 15085, DIN 2303 and further standards Support by International Welding Engineers/Inspectors (IWE/IWI), additionally qualified according to EN ISO 9712
- Manufacturer's certificates also as part of a quality management audit according to EN ISO 9001
- Support in all welding-related tasks
- Information regarding current changes to standards and legal questions
- Manufacturer qualification, welding procedure and personnel qualification from one source

The benefit to you:

- Effective marketing of your services based on certified suitability
- Internationally-recognised TÜV NORD certificates
- Comprehensive, one-stop project support
- Training courses for your employees
- Flexible access to all necessary documents in the TÜV NORD "Welding Qualification" portal

Our expertise:

- Many years of experience in national and international projects
- Accreditation as a neutral inspection organisation
- Up-to-date knowledge of national and international standards
- Fast reaction time
- Strong regional presence

We look forward to sharing our expertise with you.
